WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/NL2006/050133

	Box	No. I Basis of the opinion
1.	With	regard to the language, this opinion has been established on the basis of:
	⊠ 1	the international application in the language in which it was filed
		a translation of the international application into , which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1 (b)).
2.	With nece	regard to any nucleotide and/or amino acid sequence disclosed in the international application and essary to the claimed invention, this opinion has been established on the basis of:
	a. ty	pe of material:
		I a sequence listing
		1 table(s) related to the sequence listing
	b. fo	rmat of material:
		on paper
		in electronic form
	c. tin	ne of filing/furnishing:
		contained in the international application as filed.
		filed together with the international application in electronic form.
		furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Add	itional comments:

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

Re Item V.

1. Reference is made to the following documents:

D1: EP 0 493 332 A (COMES SRL [IT]) 1 July 1992 (1992-07-01)

D2: DE 102 14 712 A1 (SVD VERPACKUNGEN GMBH) 16 October 2003 (2003-10-

16)

D3: GB 540 564 A (ARTHUR RYNER; WALTER HUGH FAWKES) 22 October

D4: US-A-3 496 059 (OLE-BENDT RASMUSSEN) 17 February 1970 (1970-02-17)

2. INDEPENDENT CLAIM 1

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.
Document D1 discloses (the references in parentheses applying to this document):

A method of manufacturing a foldable bag suitable for use in a bag-in-box assembly, the foldable bag having a folded condition in which it includes at least an

inwardly creased bag portion (fig 7) in a longitudinal direction thereof, the method comprising the steps:

- providing a flexible bag comprising a front sheet (3) and a back sheet (3) which are circumferentially joined to each other, which bag has an unfolded condition in which it includes at least a side edge (fig 7);
- displacing the front sheet (3) and the back sheet (3) away from each other in at least a region of displacement extending on each of the sheets remote from the side edge, hence creating a space between the front and back sheet (3) in at least said region of displacement;
- displacing the side edge in the direction of said space so as to form two double-walled flaps (fig 7), each extending substantially perpendicularly to the side edge, thus forming an inwardly creased bag portion in the longitudinal direction of the bag;
- moving the flaps to each other when the side edge has reached a predetermined position between the front and back sheet (3) of the bag. (abstract; col 2, line 58 col 5, line 30; fig 1-3, 6 and 7)

INDEPENDENT CLAIM 9

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 9 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document):

A foldable bag suitable for use in a bag-in-box assembly, the bag having a folded condition when it is empty, in which condition the bag includes a bottom edge and a top edge opposite to each other in a longitudinal direction of the bag, and at least an inwardly creased bag portion in the longitudinal direction of the bag, which inwardly creased bag portion has a first closed end and a second closed end opposite to each other in the longitudinal direction of the inwardly creased bag portion, wherein the first and/or second closed end of the inwardly creased bag portion is a free end. (abstract; col 2, line 58 - col 5, line 30; fig 1-3, 6 and 7)

For the sake of completeness, it is pointed out that each of the documents D2 and

D3 also discloses the subject-matter of claim 9.

4. DEPENDENT CLAIMS 4, 5, 10, 11

Dependent claims 4, 5, 10, 11 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty (10 and 11) or inventive step (4 and 5) (Article 33(2) and (3) PCT), see Search Report and the prior art cited therein.

5. DEPENDENT CLAIMS 2, 3, 6-8

Dependent claims 2, 3 and 6-8 meet the requirements of the PCT in respect of novelty and inventive step (Article 33(2) and (3) PCT), because none of the prior art documents appears to suggest the subject-matter of these claims.

Re Item VII.

- 1. Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (document D1) being placed in the preamble (Rule 6.3(b)(I) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).
- 2. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1-D4 is not mentioned in the description, nor are these documents identified therein.
